

Making Our Built Environment Accessible

A photograph of four people in professional attire reviewing large blueprints. One person is in a wheelchair. They are outdoors, with a modern building in the background.

At Accessibility Services, **we are committed to your needs.** Our dedication to your projects is why our customers keep coming back.

ABOUT US:

Accessibility Services is renowned for its **exclusive dedication to making our built environment accessible to people with disabilities.** A proud program of United Spinal Association, a national nonprofit serving wheelchair users, our unique expertise sets us apart and instills confidence in our clients.

We helped write the landmark Americans with Disabilities Act, the Air Carrier Access Act, and the Fair Housing Amendments Act. Today, we actively work with local and state jurisdictions to update building codes and with the International Building Code Council to develop IBC and IEBC accessibility requirements.

With our **decades of experience,** Accessibility Services can help you navigate the often-conflicting requirements of aesthetics and accessibility. We will keep you updated on changes and revisions in building codes at all levels, **offering innovative solutions to accessibility for any facility.**

ACCESSIBILITY SERVICES CONSULTING

We work with you throughout your project, from reviewing architectural plans to site inspections and every step in between.

Frequently overlooked aspects of building design, such as the placement of grab bars, doorway widths and ramp slopes, can create insurmountable difficulties for people with disabilities.

Our attention to detail ensures this won't happen to you and that your project meets the accessibility requirements.

WE OFFER:

Plan reviews for new buildings and buildings undergoing alterations, from schematic design to construction drawings.

Site inspections throughout the construction process for new buildings and buildings undergoing renovations.

Existing building inspection to **ensure compliance with existing codes and laws**.

Our Expert witness services are designed to help businesses that cannot reasonably remove all barriers become as accessible as possible. In cases where a business is facing legal action for non-compliance with accessibility laws, we can **provide expert consultation** to support their efforts to improve accessibility.

Our Technical assistance is a key part of our service. We provide ongoing support and guidance throughout the project, ensuring that your **facility remains accessible and compliant with all relevant codes and laws**.

OUR PROJECTS

From **giant sports stadiums to mom-and-pop restaurants**, we have provided accessibility consulting services for a wide range of projects. While we respect our clients' privacy and sign non-disclosure agreements upon request, we are proud to share these notable projects:
